### Housing Inventory and Usage Analysis of Bar Harbor, ME

Identifier: 2394

Type: Map

Title: Housing Inventory and Usage Analysis of Bar Harbor, ME

Subject: Places

Description: High number of tourist every summer and the popularity of Bar Harbor are raising the prices of housing on Bar Harbor making it difficult to find affordable houses; especially for people who want to live in Bar Harbor year round, as the incentives to rent out housing to tourists are high. To understand better how to tackle this housing crisis it is important to understand the housing situation in Bar Harbor better, to later be able to find the right locations for future housing development.

## Leach's Storm-Petrel Distribution on Great Duck Island

Identifier: 2390

Type: Map

Title: Leach's Storm-Petrel Distribution on Great Duck Island

Subject: Nature, Animals, Birds

Description: Great Duck Island (GDI) is a 91-hectare island lying 13 kilometers south of Mount Desert Island in the Gulf of Maine. GDI has a long history of human occupation, and has been farmed, grazed, and lived upon since the early 19th century. Today, approximately 85 hectares of the island are co-owned by TNC and the state of Maine and has been managed as a preserve since 1985. There is a small private inholding on the north end of the island, and the remaining five hectares are owned by the College of the Atlantic (COA). COA manages the Alice Eno Field Station out of the light station on the south end of the island, where students have conducted regular research on the ecology of the island since 1999 (Anderson 2018)

## Multi-Use Paths on Mount Desert Island

Identifier: 2391

Type: Map

Title: Multi-Use Paths on Mount Desert Island

Subject: Places

Description: Nynke's project included conversations with community members and leaders, fieldwork to find abandoned paths, designs of multi-use

paths, and map-making in GIS. This project flowed out of an earlier class focused on Active Transportation (Bicycle and Pedestrian) in Bar Harbor in the Spring of 2022. However, this project is not supposed to be about me; I am far from a neutral player that collected information to revitalize Active Transportation advocacy on MDI.

## River Herring in the Concord River Watershed

Identifier: 2384

Type: Map

Title: River Herring in the Concord River Watershed

Subject: Nature, Animals, Birds

Description: Since long ago, each spring the River Herring swam up the Concord, Sudbury and Assabet Rivers (SUASCO) in unfathomable numbers to spawn. Their numbers turned the sluggish river turbulent with movement, and their masses colored the water black. Nipmuc, Pawtucket, and Massachuset people, their ancestors before them, and later English colonists, treasured these runs for food and fertilizer, and many seasonal communities were once situated at ideal fishing places. The industrial revolution came with largely little heed to the fish or those that used them.

## Lost Trails of Mount Desert Island

Identifier: 2382

Type: Map

Title: Lost Trails of Mount Desert Island

Subject: Places, Landscape

Description: The history of the trail system on Mount Desert Island is complex, dense, and vast. There were many people who were vital to the creation of the hundreds of trails that exist and have existed on Mount Desert Island. Both organizations and individuals contributed to the planning, building, and maintenance of the trails that make up Acadia National Park.

## Nesting Sea Turtles on a Changing Caribbean Island

Identifier: 2381

Type: Map

Title: Nesting Sea Turtles on a Changing Caribbean Island

Subject: Nature, Animals, Birds

Description: The Buck Island Sea Turtle Research Program (BISTRP) is a long-term sea turtle monitoring project that focuses on nesting sea turtles in the Caribbean. BISTRP was initiated by the National Park Service in 1988 after Buck Island was identified as an important nesting beach for sea turtles, in particular for the critically endangered Hawksbill sea turtle. Since 1988, the program has conducted annual monitoring of the nesting sea turtles on Buck

Island with the goal of identifying each nesting female, collecting biological data, and tracking nest success on the island.

## Northern Pacific Sound Pollution

Identifier: 2377

Type: Map

Title: Northern Pacific Sound Pollution

Subject: Nature, Animals, Birds

Description: The longest distance a human shout has been heard from is just over 10 miles, and that scream happened over a lake. Researchers have estimated that a whale scream, or more so a song, can be heard from over 10,000 miles away! Though we can't always hear these songs because of their low frequencies, whales can listen and respond to each other from oceans away.

## Where Do Gulls Go?

Identifier: 2283

Type: Map

Title: Where Do Gulls Go?

Subject: Nature, Animals, Birds

Description: Herring gulls are found around the world, not only by the sea, despite often being called "seagulls". There is debate over the herring gull's taxonomic status. American ornithologists lump herring gulls in North America and Europe, while European ornithologists split them. They are often described as scavengers, though there is evidence that individual herring gulls specialize on particular food sources (intertidal, aquaculture, ocean, anthropogenic, freshwater).

### Bicycles: An Alternative form of Transportation in the Netherlands

Identifier: 2179

Type: Map

Title: Bicycles: An Alternative form of Transportation in the Netherlands

Subject: Other

Description: The streets are commonplace to all of us. They are a playground to some and a time limit to others. Many of us would love to see the street as a safe place for communities to gather and for people to play and recreate. As long as it does not limit us to work in time. Growing up in the Netherlands I have never seen these two as a conflict, and with the help of some maps, I will show you how road infrastructure in the Netherlands can accommodate both these groups.

### Coastal Marine Life History of Mount Desert Island 1903-2021

Identifier: 2143

Type: Map

Title: Coastal Marine Life History of Mount Desert Island 1903-2021

Subject: Nature, Animals, Birds

Description: Mount Desert Island, located off the east coast of Maine, is completely surrounded by intertidal environments. Throughout the 1900s, data was collected and recorded in notebooks regarding intertidal life by numerous researchers, followed by entry into a spreadsheet by Michael Hays, a citizen scientist who worked with the MDIBL (Mount Desert Island Biological Laboratory). In present day, these data can be put into a map thanks to ArcGIS Pro. These data includes large amounts of information regarding marine life around the coastal environments of MDI, such as species common and Latin names, locations observed (where on the island along with Lat. and Long.), observation year, along with some brief notes about each observation.

Subject: Places, Landscape

Description: In the midst of the current climate (COVID) our orbit has become smaller, but not less valuable. Limitations can bring to the surface observations that would not have been visible before. The familiar paths within the neighborhood hold unnoticed details, questions, and knowledge. Landscapes consist of natural and human shaped relics that mark human values and skills. However, the familiar sometimes feels so known that we stop observing the way new landscapes draw curiosity. Can we unlearn the knowledge that clouds our minds for new thinking? When we aim for a deeper connection with the outer we can also better understand the inner landscape. They are inseparable and by changing one - we shape both.

## Landscape of Change

Identifier: 2082

Type: Map

Title: Landscape of Change

Subject: Nature, Animals, Birds

Description: Exploring the Past to Build a Resilient Future

To understand how climate change is affecting Mount Desert Island we need to look to the past. Our ancestors documented the natural world around them in stories, reports, journals, diaries, and letters, which are cared for in the collections of history museums and libraries. Increasingly, scientists are pulling observations and data from historic records to get a clearer picture of the natural world of the past to understand how the present is changing.

#### Global Restrictions on Shark Finning

Identifier: 2041

Type: Map

Title: Global Restrictions on Shark Finning

Subject: Nature, Animals, Birds

Description: An estimated 73 million sharks were killed last year, primarily for their fins. Their populations are at critical levels, and they are still being fished out of the oceans at unsustainable rates. Some regional populations of shark species are down to 95 - 99%, which is considered functional extinction.

### Geology and Humanity of Oahu

Identifier: 2050

Type: Map

Title: Geology and Humanity of Oahu

Subject: Places

Description: According to the University of Hawaii's Honolulu Climate Change Commission, Oahu is the most at risk from sea-level rise compared to all other Hawaiian islands. By the middle of the century, a report assembled by the commission warned that regular high tide flooding with 3.2ft of local sea-level rise would put 18 miles of coastal road and 4000 settlements at risk (Westfall, 2018).

### Cheetahs in Southern Africa

Identifier: 2047

Type: Map

Title: Cheetahs in Southern Africa

Subject: Nature, Animals, Birds

Description: Under the IUCN (International Union for Conservation of Nature) 's, cheetahs are listed as vulnerable. This status means the species is likely to become endangered unless the circumstances threatening its survival and reproduction of the species improve. Due to recent studies showing a significant decline in current cheetah numbers, scientists have started calling for the species to be up-listed to endangered status under the IUCN.

### The Dynamic Forest Cover of Great Duck Island

Identifier: 2045

Type: Map

Title: The Dynamic Forest Cover of Great Duck Island

Subject: Nature, Plants

Description: Great Duck Island is a 237-acre island 15 km south of Mount Desert Island, Maine. It served as a manned Coast Guard lighthouse post from 1890 until 1986 when it was automated. Sheep grazed the island from the late 19th century until 1951, dramatically impacting the landscape and ecology of the island. In 1985, the Nature Conservancy and the State of Maine gained control of most of the island, collaborating with the College of the Atlantic Eno Research Station to monitor the ecology of the land.
